KISS 2U 886LCD-M/Flex

2U Kontron Industrial Silent Server

The KISS 2U system has been designed with flexibility in mind and can accommodate FlexATX motherboards, all in a chassis that can be used as desktop or 19" rack mounted cabinet.

The main attraction of KISS 2U servers is their extremely low noise level, which is inaudible against normal conversation.

KISS IPC servers are thus ideal for most noise-sensitive environments such as hospital operating theaters and computer server rooms. The performance and maximum of configuration of KISS servers are based on Kontron's extensive range of CPU boards and backplanes, which allows them to be adapted to meet a very wide range of requirements.
